ATA To IDE Drive with *Hot Swap Function*.

The C.M.IDE-412HS is a drive that allow computers with IDE controller to read & write Compact Flash Cards Type I & Type II (Micro Drive) directly adapter is not required. The module converts 50-pins Compact Flash card to a 40-pin IDE signal. Especially, we added the Hot Swap function to have more convenient for user under Win98/Me, which enable users to insert & eject Flash card without turning off PC System power, it's much convenient way for user.
